Tonči Marinac, Frontend Web Developer

I am a 24-year-old computer science master's student with a strong background in front-end development and a year of professional experience. My work has involved building modern, interactive web applications using a variety of frameworks and tools, adapting to different project requirements. In 2024, I was part of a four-person team that won the RiTeh hackathon, where I contributed as a front-end developer. We built *RukaZaRuku* (Hand in Hand), a community-driven platform that enables local communities to exchange services using in-app tokens.
